

Bottlenose dolphins are the most well-known type of dolphins. They live in seas all over the world except those around the Arctic and Antarctic Circles. They are 2-4 meters long and weigh between 150 and 650 kilograms.

Although they are rather small among marine mammals, they are outstanding jumpers with great braking force. These master swimmers can swim approximately 45 kilometers per hour in short bursts. They are friendly and curious creatures who are thought to communicate among themselves by letting out various sounds or through body expressions.

■ **Parts list (pattern) :Five A4 sheets**

■ **Assembly Instructions : Three A4 sheets**

- \*Read the Assembly Instructions carefully in page order referring to the page numbers on the parts list.
- \*It is easy to get pieces mixed up if you cut them all out at once, so just cut the pieces as you need them.
- \*Red numbers are numbers of each respective part. Gray numbers are numbers of parts to be attached to red parts.

**Assembly Instructions**

	Mountain fold line (dotted line) ● Make a mountain fold.		Cut line (solid line) ● Cut out.
	Valley fold line (dotted and dash line) ● Make a valley fold.		 Cut out ● Cut these areas out.

	1. Use a set square or ruler and a dried up pen to score along the dotted lines, and fold along them to make creases.		3. Use scissors to cut along the solid line.
	2. Work curves into the pieces using a metal rod before beginning assembly. For small pieces, add curves before cutting them out.		4. The pale-colored numbers on the glue tabs indicate the number of the part to be attached there. Use a spatula for the small glue tabs.

**Tools and Materials**

Scissors, set square, glue (such as woodwork glue), metal rod, spatula, a used pen, toothpicks, tweezers (useful for handling small parts).

**Assembly tip**

Before gluing, crease the paper along mountain fold and valley fold lines and make sure rounded sections are nice and stiff.

**Caution**

Glue, scissors and other tools may be dangerous to young children so be sure to keep them out of the reach of young children.

Glue tabs have been omitted from the diagrams to make them easier to understand.

-  curl
-  glue
-  Attachment order.

\*There is no specific order for attaching glue tabs without green attachment order numbers. However, only attach them one at a time from either end and not all at once.

②. Attach and assemble everything except for the part marked in the green line on B01 and attach to B02.

⑤. Assemble Fin-b, and attach it to B02.

④. Assemble Fin-l and Fin-r, and attach them to B01.

③. After attaching B01 and B02, attach the parts marked in the green lines on B01 and B02 to close the body. Then, attach by following the correct order (refer to the green numbers). Use a stick for areas where you cannot use your fingers.

PAGE02

⑨. Add and attach M01 to B01.  
Then, attach M01's glue tabs.

⑩. Assemble M02 and M03, and attach them to B01.

⑥. Curl B03 into a cylindrical shape and attach to B02.

⑪. Add and attach D02 and D03 to D01.

PAGE05

PAGE04

PAGE03

⑦. Curl B04 and B05 respectively into a semi-conical shapes and attach them to B03.

⑧. Assemble M01 and TFin-r, and attach them to B04 and B05.

⑫. After assembling D01, D02, and D03, attach D04 on the bottom.  
Then, attach D05 and D06 and place the completed dolphin on top.
