

## CREATIVE PARK

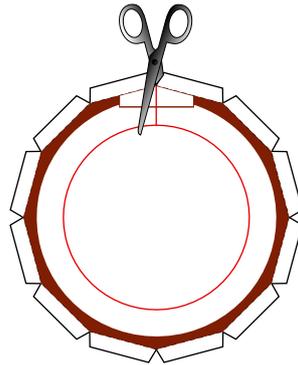

<http://www.canon.com/c-park/>

### Assembling the main body of the lunar globe

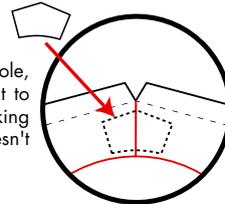

1. Cut out the front side of the Moon (upper half) and the back side of the Moon (upper half) and glue them together using the central tabs.

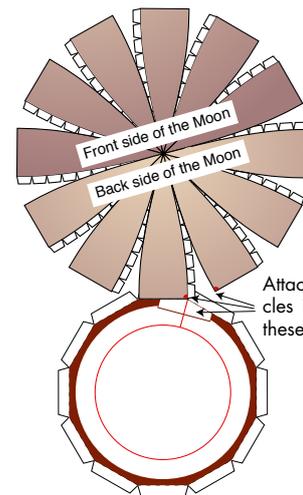

2. Cut out the upper half base. Use scissors to cut out the center hole. Cut out the center by first cutting with scissors along the red line connecting the center to the exterior.

After cutting out the hole, glue the reinforcement to the reverse side, taking care to ensure it doesn't obstruct the fold lines.

3. Glue the back side of the Moon (upper half) to the upper half base by attaching the red circles on the back side of the Moon (upper half) into place on the glue tabs near the joints of the upper half base, as shown in the illustration.

Attach the red circles into place at these positions.

Before starting assembly: Writing the name of each section on its back side before cutting out the sections is highly recommended.  
(\* This way, you can be sure which section is which even after cutting out the sections.)

→ Indicates where sections should be glued together.

→ Indicates where to insert sections. Do not glue the sections together.

\* This model was designed for Papercraft and may differ from the original in some respects.

### Assembly Instructions : Three A4 sheets (No. 1 to No. 3)

\* Build the model by carefully reading the Assembly Instructions, in the parts sheet page order.

\*Hint: Trace along the folds with a ruler and an exhausted pen (no ink) to get a sharper, easier fold.

### Assembly Instructions

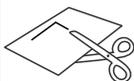

**Mountain fold (dotted line)**

Make a mountain fold.

**Valley fold (dashed and dotted line)**

Make a valley fold.

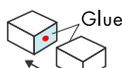

**Scissors line (solid line)**

Cut along the line.

**Cut in line (solid line)**

Cut along the line.

Glue

The glue spot (colored dot) shows where to apply the glue.

**● Glue spot (Red dot)**

Glue parts with the same number together.

**● Glue spot (Green dot)**

Glue within the same part.

**● Glue spot (Blue dot)**

Glue to the rear of the other part.

### Tools and materials

Scissors, set square, glue (We recommend stick glue), pencil, used ballpoint pen, toothpicks, tweezers, (useful for handling small parts)

### Assembly tip

Before gluing, crease the paper along mountain fold and valley fold lines and make sure rounded sections are nice and stiff.

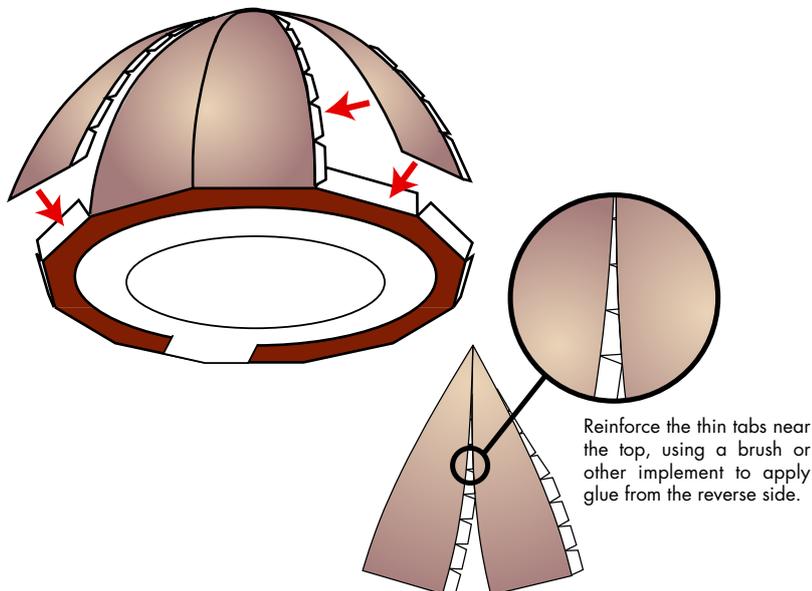

### Caution

Glue, scissors and other tools may be dangerous to young children so be sure to keep them out of the reach of young children.

# Lunar Globe : Assembly Instructions

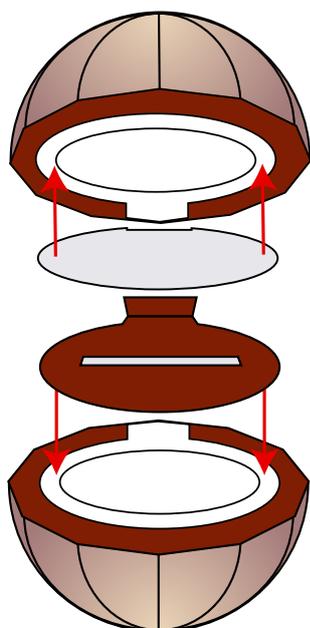

4. Glue the parts of the upper half together so that its shape is semispherical. To fit the parts together correctly, gently fold the tabs inward, then align the surface features (e.g., craters) while holding the upper half base down with your finger and gently pulling on the tabs. Assemble the lower half in the same way.

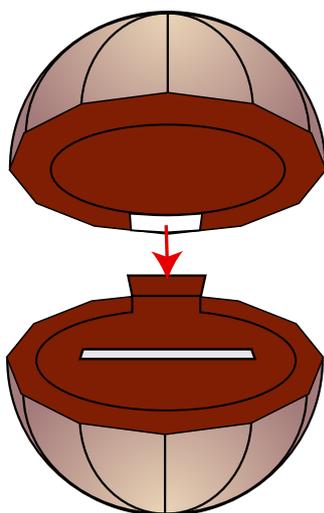

5. Fold the lid of the lower half base in half and cut out a slot so that Moon story plates can be inserted. Flatten out the lid.

6. Glue the upper half base lid to the upper half base and the lower half base lid to the lower half base to cover their holes.

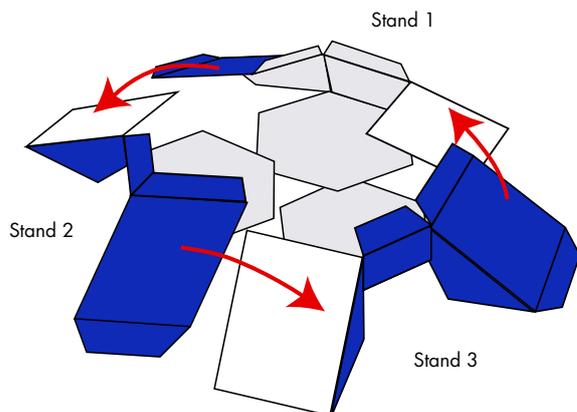

7. Glue the upper half and the lower half together at the joint.

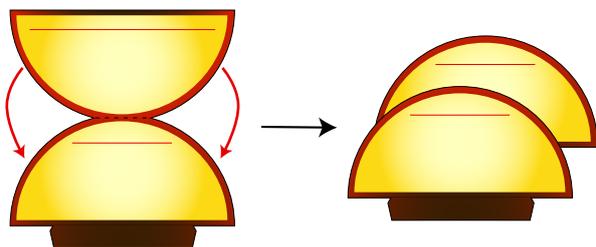

# Lunar Globe : Assembly Instructions

## Assembling the stand

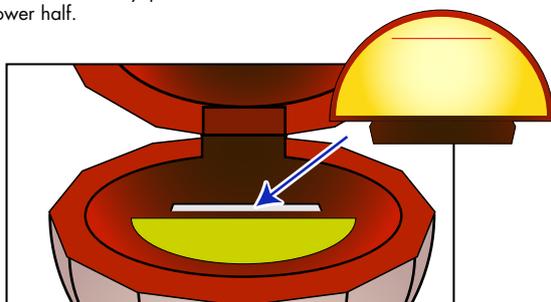

1. After folding stands 1, 2, and 3 according to the directions, arrange the three hexagons on the three parts so that they are positioned face to face. Glue them together so that the colored parts facing each other face upward.

2. Align and glue the rear surfaces of the Moon story plates together.

3. Insert the Moon story plates into the slot on the lower half.

Finished!
